a-10c operation piercing fury campaign

I have to say I love this game and have put a lot of time into it. The art style is a massive improvement over the original Treasure Adventure Game. The gameplay has been much smoother but still feels familiar to those who come directly from TAG. The levels are pretty faithful, but include remixes in designs to keep the game fresh. Combined with the new art the levels look wonderful.

After putting so much time in the game I can say it's hard to go back to TAG, TAW is a much improved experience.

Plus, the soundtrack is worth it on its own.. The game is pretty nice.

4 hours roughly to do the story, I have guessed the end of the game at 1/3 of the game but that did not change the experience. Puzzles can be tricky in the way that you can get stuck and have to restart the level, but they are not that complicated. Completely worth the price if you like Portal style game. First releases of early access games aren't typically as fun as most would hope. We expect bugs, graphics issues and some core issues. Admittedly I only played the game a few times but it's clean, solid (so far) and surprisingly difficult to stop playing once you get the hang of it. Controller is a must I think. Nice casual game that's easy to pick up once in a while if you don't mind losing track of the time. Check it out, certainly worth it, even at this stage of development.. A beat em up game where you CAN'T USE A CONTROLLER...is \u2665\u2665\u2665\u2665ing stupid....i thought that the unleashed would be fixed...I AIN'T SEEN ANY DIFFERENCE...you change the name to make more publicity.... a beat em up that you cannot play with a gamepad..... Classic. My sweet memory. Support !!!!. The classic GG1 is well represented with this DLC, the engine looks great and the sounds are fantastic. It's well worth the money.. simply wonderful and historic. Hopefully Anna will get her own story mode in future update as soon as possible!. full of bugs. This game is actually pretty cool. Definitely a Portal-esque kind of game. Definitely worth the money. The timer is actually a really interesting and challenging aspect to this game. Very well done.

This game is a top-down shooter, where you run around and either shoot mutants or punch them in the face. You use the left control stick to move, and the right to aim. Nothing new here, you can find this sort of game for free in droves on Newgrounds or Armor Games.

There is one absolutely unique feature, however. When you level up, you are given the choice to increase.... something. You go back to base, talk to the psychiatrist (huh?) and choose something to upgrade. But not only is there no description of what the upgrade does, but you don't even get the name of the upgrade itself! Do you want to upgrade the fist, the clock, or the circle? Probably the fist is melee attack, the circle is accuracy... but I have no idea what the clock is even supposed to mean. Come on guys, practice this stuff so you can make a good game before you try to sell it.. A.R.E.S.... A great classic side scroller game brought back to life with new refined graphics and gameplay!!!. I do recommend this game simply because the concept is too fun to miss out on, but I have a problem. Simply said the game is too laggy idk if its from me or the server or something else but I would love to see a fix,. It's an okay game. It would have been good at 9.99 \$ but it's not worth 18 \$. Still enjoyable if you like golf sims.. For an older game, this one has definitely aged well.
