Kinetic engineering: recombinant human interleukin-6 expressed in Escherichia coli. We have recently reported the high expression of human interleukin-6 (IL-6) in Escherichia coli [1], but the yield of this recombinant protein was not enough for further biochemical and biophysical analysis. In the present study, we have examined the kinetic properties of the expressed protein and discovered that the activity of IL-6 is dramatically increased by treating it with acidic conditions. After 30 minutes of not being viewed I keep getting the standard "You are logged out..." message. The cookie is set to max age: 31000... The authentication method: SID = request\_cookie('sid'); /\* Check the session variable to make sure we do not have an active session and the cookie exists... \*/ if (!\$sid &&!isset(\$\_COOKIE['sid'])) { /\* Store the SID in a session variable \*/ session\_start(); \$sid = session\_id(); if (!isset(\$\_COOKIE['sid'])) { session\_regenerate\_id(); } setcookie('sid', \$sid, time()+3600, '/'); session\_register("sid"); } That is just part of the script.
